VESOPS KYST · FOR OPERATORS AND CHARTERERS

VesOPS
Sustainable Performance

What does each voyage really cost?

Measured fuel and bunker cost on every ship you charter, whoever owns it – checked against the charter party and ready for your cargo customers.

VOYAGE SUMMARY · FREDRIKSTAD → AARHUS — MEASURED

Distance	Average speed	Fuel burned	Bunker cost
204 nm	10.0 kn	6.8 t	$4,760

Measured	6.8 t	+0.5 t over warranty: $350 on this leg
Charter party	6.3 t	21.8 t CO_2 · 6.1 kg per tonne of 3,600 t cargo

Illustration, example values; MGO at $700 per tonne

FOR THE OPERATOR

Check every leg against the charter party.

- Fuel and speed measured on board, leg by leg, and compared with the consumption each charter party warrants.
- Evidence for a performance claim, instead of a noon-report estimate.
- Fuel cost per voyage for pricing, bunker planning and eco-speed orders.

FOR YOUR CUSTOMERS

CO_2 per voyage and per tonne carried.

Emissions per shipment	For your cargo customers
Voyage and fuel reports	One format, every owner
Speed and consumption	Against each charter party

- The owners get their EU MRV reporting from the same data, which makes fitting the meters an easy yes.
- Works on board without a connection; data goes ashore over 4G when there is coverage.

See it on your chartered fleet.

Your ships, legs and fuel, shown in 30 minutes.
